

R G BALLARD LTD

ELECTRICAL CONTRACTORS & ENGINEERS

ESTABLISHED 1962

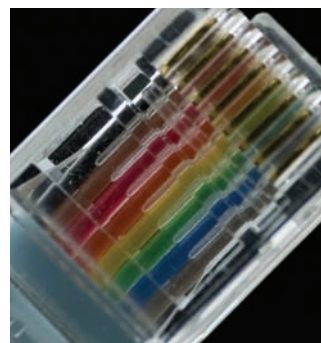

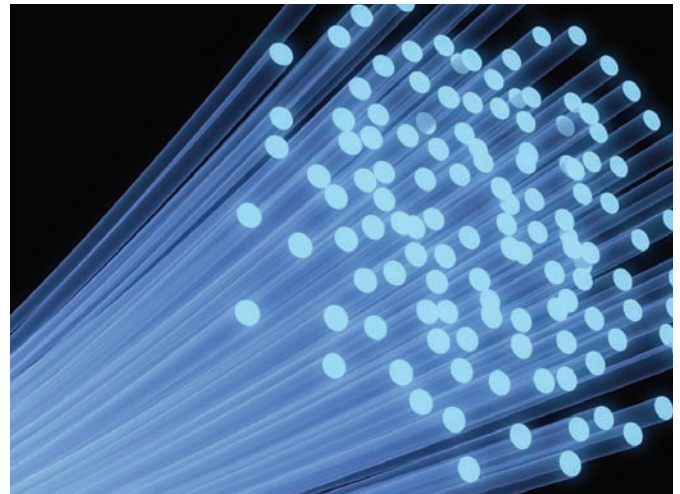

We specialise in Electrical installations, Data Cabling, Voice infrastructure, providing high quality workmanship and a professional service to all projects, large or small, to approved technical standards.

Electrical contracts are undertaken by a highly skilled permanent workforce, many of whom are long-serving and all of whom take great pride in their craftsmanship.

Similar care and attention is displayed in Data Network installations. In-house managers, whose single-point responsibility ensures value for money, adherence to programme dates, and full compliance with the client's aims, and requirements, direct the engineering workforce.

All work is conducted to nationally recognised certification levels.
